

SATURN Ceiling Hoist

Manufactured by one of the worlds leading ceiling hoist companies, the new Saturn is a versatile, economical ceiling hoist system with a full range of options and accessories. Easily installed in any room, the Saturn provides the total patient handling solution quickly, simply and within budget.

Economical
Strong
Flexible

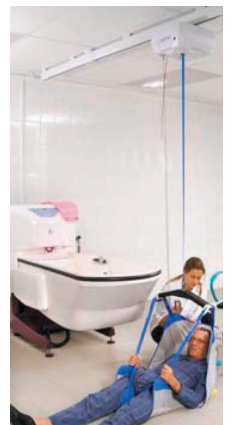

- Compact, discreet design
- Industry standard spreader bar
- Impressive 250kg / 39.5st capacity
- Manual or Powered traverse option
- Full range of track options
- Return to charge function
- Emergency stop and lower

With a modern design and a 250kg/39.5st capacity the Saturn ceiling hoist is a complete solution that caters for all patient handling needs in the bedroom, bathroom or living room.

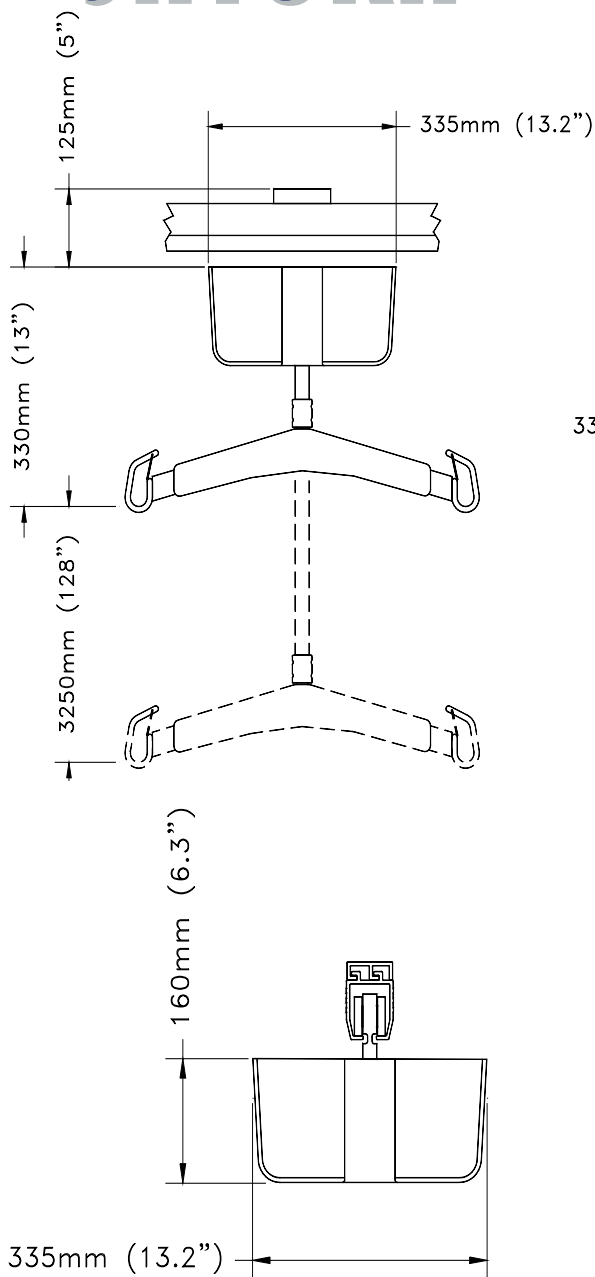

The Saturn track is discreet and easily installed and with a full range of track, bends, turntables and XY systems the Saturn can cater for any requirement.

A clever return-to-charge system will ensure the hoist returns to the charging-point at the touch of a button, saving the carer time and ensuring the hoist is always charged

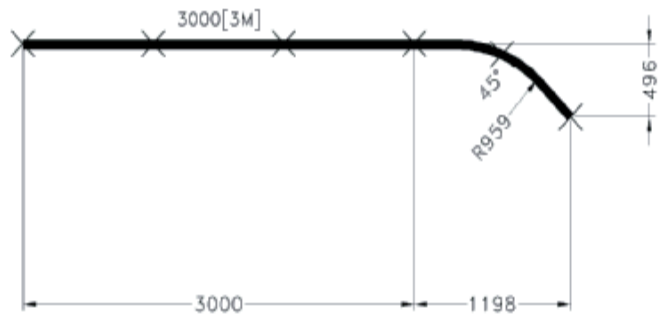

Peace of mind for the carer with a range of safety features including emergency down, emergency stop and audible battery-low system.
