Easytrack FS

The Easytrack FS™ is a lightweight, free standing overhead track system, based on many of the same principles as the current Easytrack™ range. The FS unlike the existing system does not rely on support from the ceiling taking away any potential structural issues that may have previously been encountered.

Carry bags and the Easykart™ (shown opposite) are optional accessories to aid both transportation and storage.

Easy to assemble

Position the track into the fixing clips at the top of each post.

Lock the track in place using the ski-boot clips as shown.

Adopt a comfortable position and push upwards to adjust the height of the track as necessary. The telescopic posts are spring loaded to ensure minimal effort is required.

Finally, attach the Voyager Portable unit and your system is ready for use.

NOTE: For a detailed assembly guide please refer to the user manual.

Easykart

Key Features

- Easy to assemble
- Telescopic adjustment for ease of use
- Lightweight components for ease of transportability and storage

Height:

Floor to top of rail 1830mm - 2406mm

Floor to bottom of rail 1680mm - 2256mm

Width:

Exterior width 2210mm - 3230mm

Interior width 1910mm - 2930mm

Footplate:

Length: 1075mm

Width: 150mm

Maximum user weight limit:

200kg / 30st / 440lbs

Weight:

Footplate (each) 5.5 kg

Post 9.5 kg

Rail 14.0 kg
